

Syllabus update: Cambridge IGCSE™ (9–1) Chemistry (0971) for examination in 2023, 2024 and 2025

We have updated this syllabus. The latest syllabus is version 2, published December 2022.

What has changed?		Detail
	Changes to syllabus content	<ul style="list-style-type: none"> The list of syllabus content that has been removed on page 55 has been updated. There is no change to the subject content itself: only the summary list on page 55 has been updated. <ul style="list-style-type: none"> Extraction of zinc Production of electrical energy from simple cells is now specified on the list. Please check the updated syllabus for further information.

Changes to specimen papers, published July 2021

What has changed?		Detail
	Changes to assessment (including changes to specimen papers)	<ul style="list-style-type: none"> A change has been made to specimen Paper 1 Question 32 and specimen Paper 2 Question 31, to amend option B. A change has been made to specimen Paper 3 Question 3, to improve the clarity of the introductory text. It now reads as follows: <ul style="list-style-type: none"> A coloured crystal of cobalt (II) chloride is placed at the bottom of a beaker containing water. Colour spreads throughout the water over time. Fig 3.1 shows the spread of colour after two days. No other specimen papers have been changed.

We have updated the specimen materials for this syllabus.

Please check the updated syllabus and Paper 1, Paper 2 and Paper 3 specimen papers for further information.

The syllabus has been updated. You are strongly advised to read the whole syllabus before planning your teaching programme.
